

VINEETH KUMAR YEZZU

Baldock, UK | +44 7405453381 | vineethkumar8927@gmail.com | http://linkedin.com/in/vineeth-kumar-202042131 | https://github.com/Vineeth8927 | https://www.vitaely.meundefined

Professional Summary

Proactive and results-driven **Machine Learning Engineer** with a strong foundation in designing, implementing, and optimizing ML algorithms. Experienced in leveraging **deep learning techniques** and **Python-based tools** like **PyTorch** and **TensorFlow** to solve complex problems in domains like **natural language processing** and **computer vision**. Skilled at collaborating with cross-functional teams to build scalable solutions, process large datasets, and deploy machine learning models in production environments. Passionate about solving real-world challenges and advancing scientific understanding through **data-driven solutions**.

Technical Skills

- **Machine Learning:** Deep Learning, Neural Networks, Classification, Regression, Model Deployment
- **Programming:** Python (PyTorch, TensorFlow, Scikit-learn), SQL, Julia, Bash scripting
- **Cloud Platforms:** AWS
- **Tools:** Git, Docker, Kubernetes, FastAPI, MLflow, Jupyter Notebooks
- **Data Science:** Data Preprocessing, Feature Engineering, Model Evaluation
- **Version Control:** Git
- **Operating Systems:** Linux
- **Others:** Bioinformatics, Scientific Computing, Cloud Deployment

Education

MSc Artificial Intelligence and Robotics

University of Hertfordshire | Sep 2022 – Oct 2024

- Focus: **Computer Vision, Deep Learning, Reinforcement Learning, Edge ML**

BE Electronics and Communications Engineering

Osmania University | Aug 2016 – Sep 2020

Professional Experience

Software Engineer

Accenture, Bengaluru | May 2022 – July 2022

- Designed and deployed **scalable machine learning pipelines** for predictive analytics in Python.
- Collaborated with cross-functional teams to integrate **ML models** into production systems, improving business outcomes.
- Applied **ML techniques** for data extraction and document processing, improving speed by **40%**.
- Developed **MLOps** pipelines to ensure model tracking, reproducibility, and deployment.

Associate Software Engineer

Accenture, Bengaluru | Jan 2021 – Apr 2022

- Developed and deployed **deep learning** models for **multi-modal datasets** in production environments.
- Conducted **deep learning research** using **PyTorch**, working on multi-modal data.
- Developed and deployed **reproducible workflows** for data analysis and model training.
- **Optimized model performance** through hyperparameter tuning and performance evaluation.

Projects

Crack Segmentation Using Deep Learning (July 2024)

- Developed a **U-Net-based model** for **pixel-level segmentation** of infrastructure images, achieving **Mean IoU of 0.85**.
- Trained models on **multi-GPU environments** using **TensorFlow/Keras** for scalable processing.
- Deployed inference pipelines on **edge devices** for real-time **autonomous infrastructure monitoring**.

Chatbot Development Using BERT and Sentiment Analysis (Jan 2024)

- Built an AI chatbot using BERT for natural language understanding and sentiment analysis.
- Developed and deployed APIs using **Flask**, hosted on **AWS** for **scalability and high availability**.
- Achieved **high accuracy** in **sentiment analysis** by optimizing model architecture and feature engineering.

Certifications & Training

- SAP MM Training
- Advanced Python & Machine Learning Courses
- Kubernetes & Cloud Computing

Languages

- **English (Fluent), Japanese (Intermediate), German (Beginner), Hindi (Native), Telugu (Native), Tamil (Fluent)**
